

# Recoil Drip Line Retrieval Request

Please complete the following information and fax the form to the  
Recoil Program Manager (03) 9369 3865 or email adam.roberts@netafim.com

Name ..... Phone No. ....

Address ..... Fax No. ....

..... Product Type .....

..... Estimated Quantity (m) .....

Location of material (if different to address) ..... Netafim Sales Rep. ....

..... Netafim Dealer (where goods were purchased) .....

I have read, understood and agree with the Terms & Conditions on this page

Signature ..... Date .....

**The following section will be completed by Netafim and faxed to the Customer.**

Retrieval machine delivery date	Machine & retrieved material collection date	Signature
.....	.....	.....

**Things to note:**

- Coils must not exceed 1.2 meters in diameter.
- Rope for tying coils is not supplied by Netafim.
- To assist the removal of the spool, ensure main shaft is sufficiently lubricated.
- Stacks of dripper line must be readily accessible to a B-double truck and there must be enough room to manoeuvre such equipment for loading.
- **Netafim has announced an update as of 1<sup>st</sup> October 2013 that we must have a full semi-trailer load for any on-farm pick-ups. Smaller pick-ups will need to be dropped off at your local drop off point – pls speak to your Netafim sales rep for more information.**

**Terms and Conditions**

These conditions are non-negotiable and only the Recoil Program Manager or the Pick-Up Coordinator can approve any exceptions. If these conditions are not followed, Netafim at its absolute discretion may determine not to provide the collection service.

**General**

1. All metal (eg cobra) clamps should be removed either prior to or during the retrieval process.
2. The Netafim retrieving machine should always be operated by two people.
3. The grower accepts that the sole responsibility for the use, care and safe operation of the retrieving machine rests with the grower until collection of the retrieving machine by Netafim.
4. The retrieving machine must be returned to Netafim in the same condition as it was supplied. Failure to do so will incur a charge based on any necessary repairs to the retrieving machine.
5. Only the pre-agreed quantity of dripper lines in acres or metres or kilograms will be picked up. Any extra will be collected if feasible or rescheduled to a time to be determined by Netafim.
6. A contact number and name must be provided by the grower for use at time of pick up.
7. The grower is responsible for loading the reeled dripper lines to and onto the truck immediately upon the truck attending the property to collect the dripper lines. Any delay in commencing loading of the dripper lines may lead to termination of the service by Netafim.
8. Collection times will be typically 2-4 weeks from receipt of advice from the grower that the dripper lines are ready for collection but may be up to 8 weeks depending on workload.
9. Bad weather may force rescheduling.
10. Site inspection by a Netafim representative recycler or Netafim dealer may be required prior to pick up.
11. The dripper lines must be coiled and tied into individual rolls. Use plastic twine but not wire to tie the rolls. The dripper line tubing must be rolled on coreless spools. The ties must be made of thin wall dripper line or twine or with the loose end of the dripper line. Do not use wire.
12. Do not use metal, cardboard, sticks or other plant material in the centre of the rolls of dripper line. PE or PVC centres are OK as long as they are less than 4" in diameter.
13. Loosely stacked piles of dripper line that has not been properly prepared will not be eligible for the recycle program.
14. Dripper line intermingled with plastic mulch will not be accepted.
15. Stacked dripper line must be free of trash, wood, rocks, tires and other foreign material.
16. Upon collection of the dripper lines, title and property the dripper lines shall pass to Netafim
17. In respect of the use of the retrieving machine and the collection and disposal of the dripper lines ("the services") Netafim shall be under no liability to the grower in respect of any loss, damage or personal injury or death (including loss of profits, loss of revenue, loss of opportunity, loss of use, loss of goodwill or any other direct or indirect loss or damage whatsoever) whether arising in contract, tort (including negligence), equity, pursuant to statute or any other principle of law except that, where required by law, Netafim's liability will be limited to, at the election of Netafim:
  - (i) the supply of services again; or
  - (ii) the cost of having the services supplied again.
18. Netafim would request that you seek a quote regarding new Netafim replacement dripper lines / poly pipe within 12 months of the collection date
