MixRite DOSING PUMPS

About TEFEN

Tefen is a leading manufacturer of environmental friendly, non-electric volumetric equipment and flow products since 1973.

Tefen's MixRite line of water driven proportional dosing pumps, are used to ensure precise additive injection directly into the water or fluid line under various flow rates, feed ratios and different ranges of pressure. These injectors are extremely durable, manufactured from engineered composite materials to withstand the rigors of the elements, as well as chemicals and acids for injection.

Tefen offers the MixRite pumps for a variety of applications such as medication for livestock, cleaning or disinfecting fluid lines, sanitizing water systems, car wash, cost effective fertilizing, and pest control for crops and plants. Tefen's injectors are adaptable simple to use and cost effective, while creating a long-lasting solution for your needs.

The Tefen MixRite water powered dosing pump is a simple, user friendly and ingenious system that has demonstrated its value in over 90 countries.

Tefen is certified by ISO 9001 2008

Applications

Livestock

The MixRite for livestock guarantees control over doses of treatments injected through drinking water, which is the ideal distribution method, from first day of the flock. In all kinds of livestock (poultry, pork, cattle, rabbits, etc.), the MixRite proportional dosing pump will enable you to dose treatments such as antibiotics, probiotics, enzymes, supplements (vitamins, minerals, etc.) into the water line. The proportionality of MixRite pumps guarantee the correct dose independently by pressure and water flow variations (animal consumption).

Fertilizing

The objectives of fertigation are to control water quantities and added nutrients necessary for optimum growth of crops. MixRite proportional injection technology means less waste, plus a better mix for fertilizers, pesticides and other water-soluble products.

Cleaning or disinfecting fluid lines

MixRite water powered proportional dosing pumps can be used for automatic preparation of disinfecting, lubricating and detergent solutions. MixRite injectors operate without electricity, they can also be used in remote areas for water purification to prevent and control disease.

Car washing

MixRite pumps are the perfect solution for car wash facilities of all types and sizes. It lowers the cost-per-car expense, while using less space, energy and chemical waste.

Sanitizing water systems

The sanitation and hygiene industry requires exceedingly accurate and reliable chemical mixing and injection solutions. MixRite injectors are used in market applications like hospitals, restaurants, food services, and supermarkets. MixRite pumps are easily installed in fixed or mobile installations often including static mixers, maturing tanks, flow meters, etc.

MixRite DOSING PUMPS

Features

- Mixes additive and water precisely
- The dosage can be adjusted easily and quickly
- Repair is simple and inexpensive
- Key internal parts are from the highest quality material available (hastelloy spring, Viton Rubber seal)

Advantages

- Works at low flow rate
- Easy to field maintenance
- Highly chemical resistant
- Good blending
- Highly resistant to UV damage
- Easy to install
- No electricity needed
- Easy to adjust dosing rate
- Replaceable seals

Determining the right MixRite model for each application is done according to the customer's needs and the system specifications.

Adjusting the MixRite pump

The injection rate is set up manually by rotating the sleeve to the desired proportion. The amount of injected concentrate is proportional to the amount of water flowing into the MixRite pump.

Operating principle

The unit will automatically start working when water is flowing in the water line and turn off continue until the flow will stop; it is possible to control the suction (intake) operation by using the models with the On/Off system.

MixRite

Simplicity by design

Simple maintenance

MixRite is the most simple injector to use. Less maintenance is required and no technician is needed for changing spare parts.

Simple installation

MixRite is a "Plug and Play" unit. Installation of the MixRite can be done using the instructions which are attached to each unit.

Recommended standard Installation inline

1. Main Valve
2. Back flow preventor
3. Pressure regulator
4. Filter - 130 Micron Min. (130 mesh)
5. Manometer (pressure gauge)
6. Anti siphon Valve
7. Operation Valve

MixRite DOSING PUMPS

Typical installation

Available option

Tefen's Mixrite offers pumps for a variety of applications such as: cost effecting fertilizing, adding medication for livestock, cleaning or disinfecting fluid lines, car washing, sanitizing water systems and more. MixRite offers a wide range of sizes and flow rates, and can be installed in a broad array of system configurations, besides being put.

Typical bypass installation when using large fertilizer tanks

1. Main Valve
2. Filter - Ø 3/4"-130 Micron Min.
3. Pressure regulator
4. Choking Valve
5. PVC fertilizer Valve
6. Fertilizer Filter
7. Normally closed hydraulic Fertilizer Valve
8. Fertilizer solution tank
9. 5/16" command tube

Typical plumbing control for Livestock application

- 1 Pressure regulator
- 2 Pressure Gauge
- 3 Check Valve
- 4 Water filter - 120 mesh minimum
- 5 Water Meter with Pulse
- 6 Bypass valve
- 7 MixRite Medicator

Bypass plastic piping installation with 4 different additives

1. Main Valve
2. Filter - 130 Micron Minimum
3. Chocking Valve
4. Fertilizer filter

A Combination of main filtration station and MixRite TF injector on a bypass installation.

1. Main Valve
2. Chocking Valve
3. MixRite TF Injector
4. 2" Bypass line

A Typical Bypass array installation for three MixRite TF model injectors

1. Main water valve
2. Main water filter
3. Chocking Valve
4. Fertilizer Solution Filter
5. Mixing chamber (Empty filter)

MixRite DOSING PUMPS

Typical installation

A typical double inline installation for MixRite TF models

A typical bypass installation for a single MixRite TF injector.

- 1. Chocking Valve
- 2. MixRite TF Injector
- 3. Fertilizer Reservoir Tank
